13° Angle Waiter Corkscrew in a Display

Invented by a Belgian doctor, the Oblique™ Waiter's Corkscrew with its 13° forward angle and curved handle divides the extracting force to give you a "circular pull" which makes cork extraction easier. The Teflon spiral embeds into the cork on an angle, which also means there is no risk of rupturing the cork or pushing the cork further into the bottle. A foil cutter and bottle opener tuck nicely into the handle. Each corkscrew is individually boxed.
